

# Server Setup

The first time you log into Nautilus, close the login box and go to the menu, File, Setup, and enter the following information:

Click on the icon with the yellow star, and a popup box will appear asking for Server, Type, and Information

Complete this process for both servers listed below.

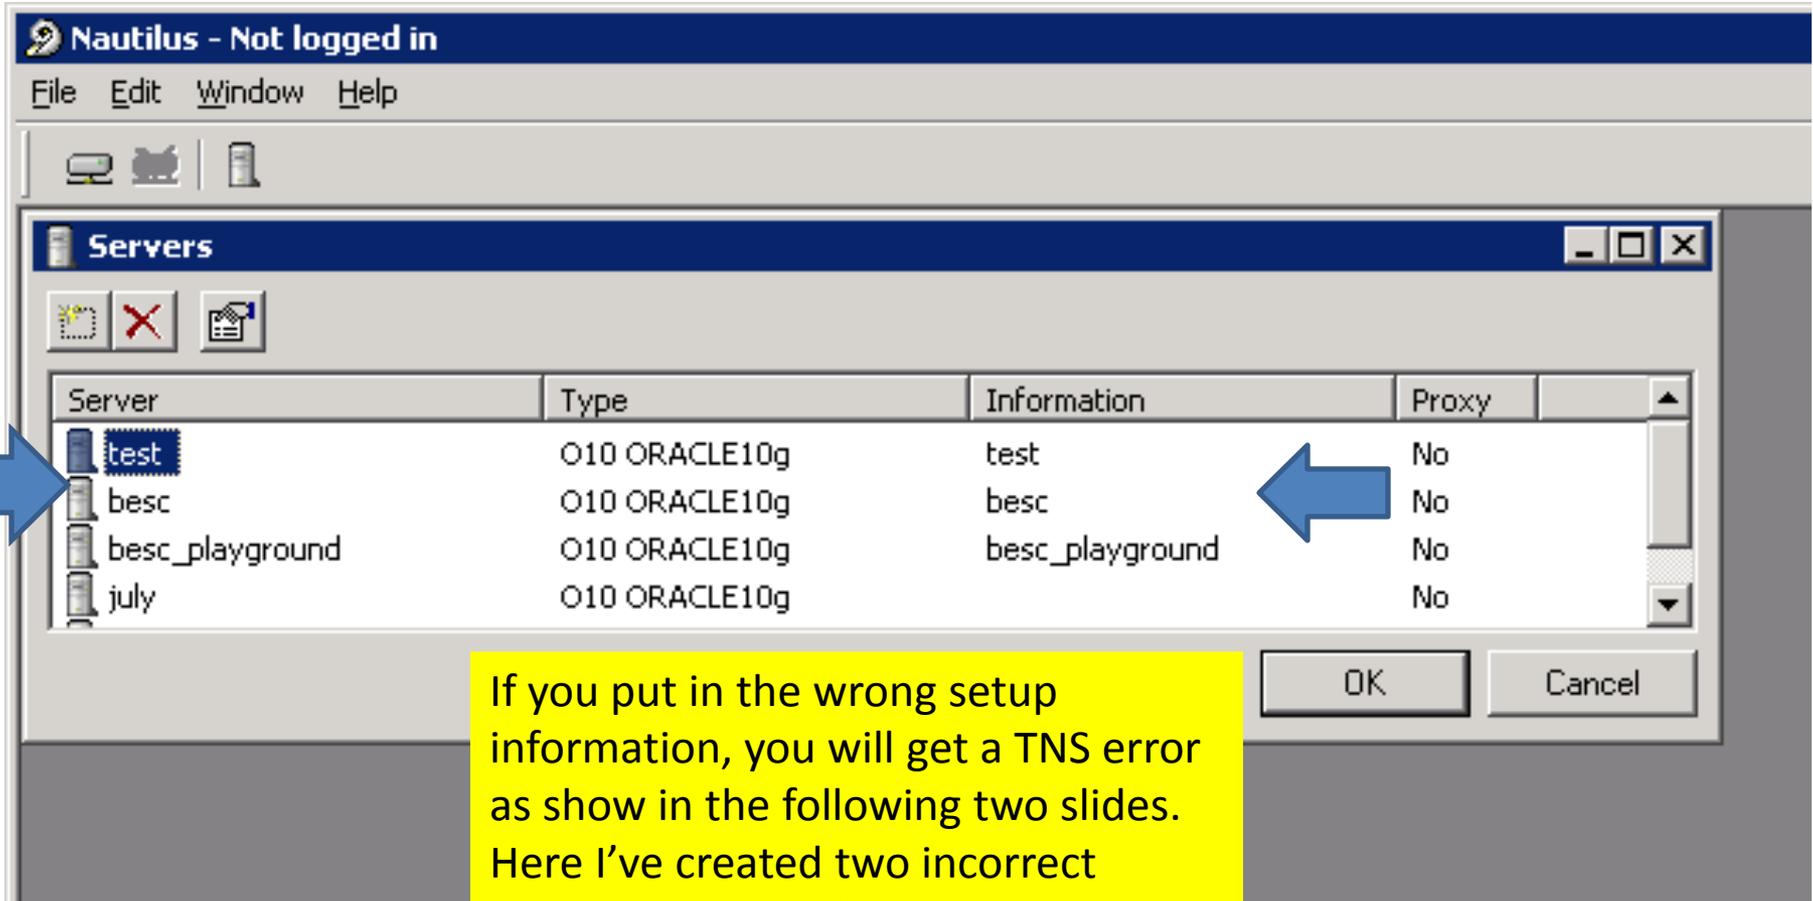

After this is done, you are OK to login.

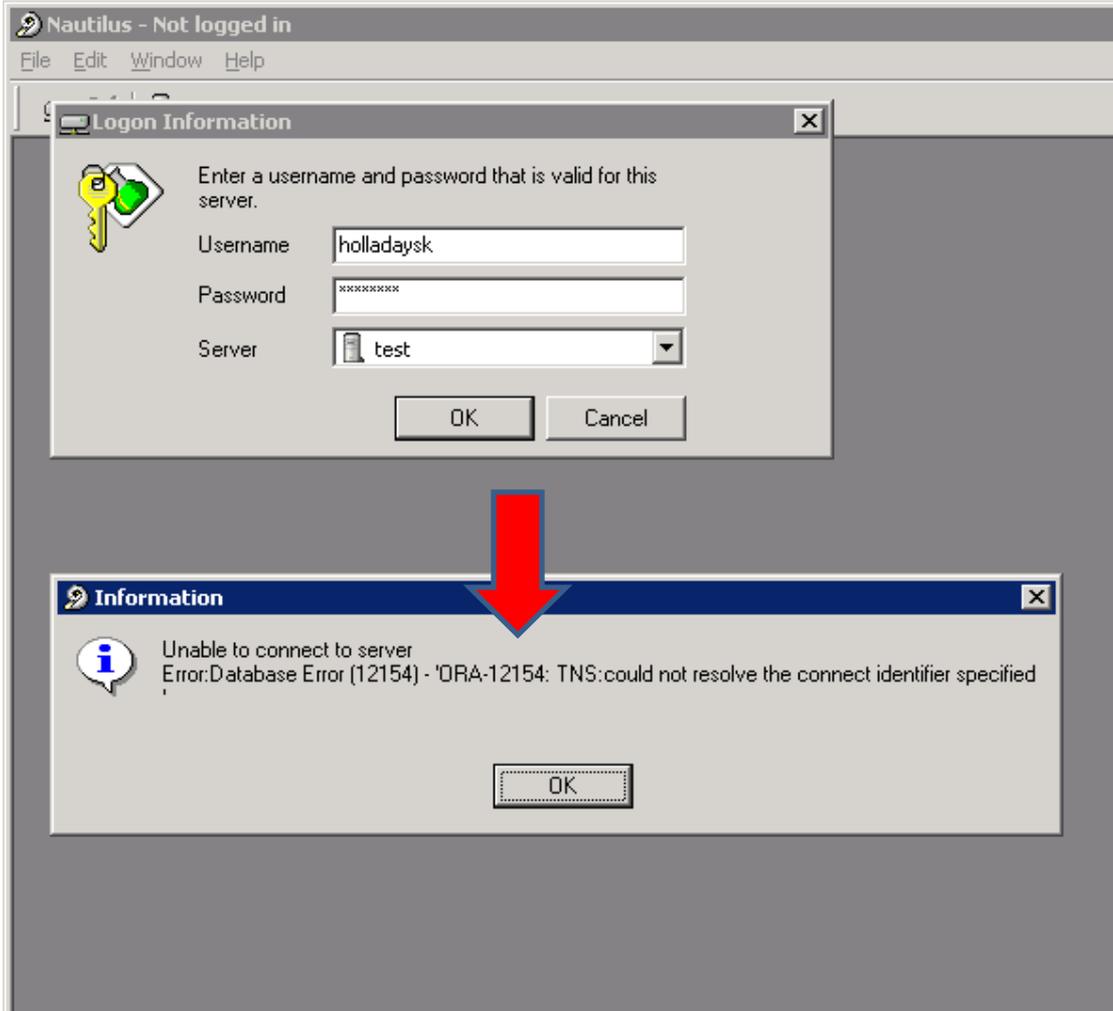

Server	besc
Type	O10 ORACLE10g
Information	besc

Server	besc_playground
Type	O10 ORACLE10g
Information	besc_playground

# Possible Errors

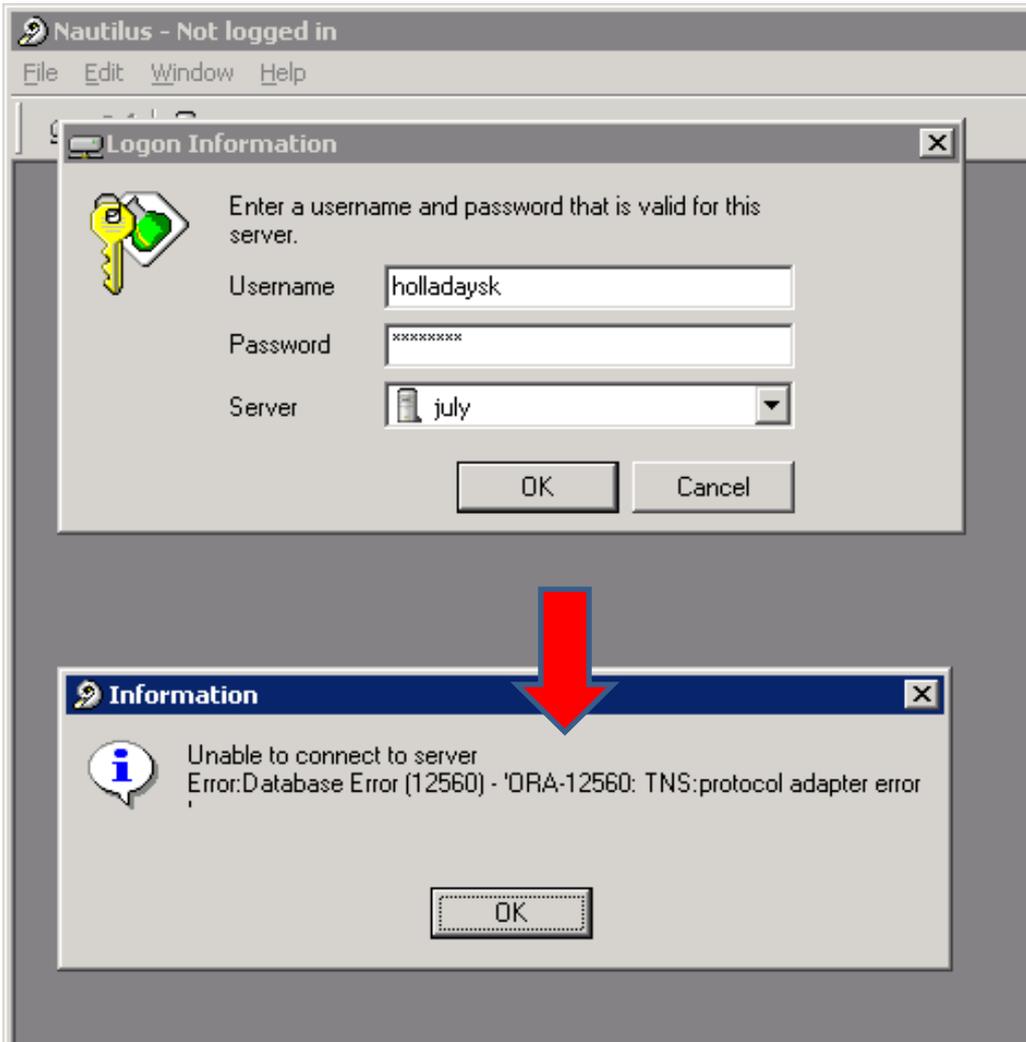

# Error ORA-12154

In this example, I entered the following into setup which are not legitimate:

Server	test
Type	O10 Oracle 10g
Information	test

# Error ORA-12560

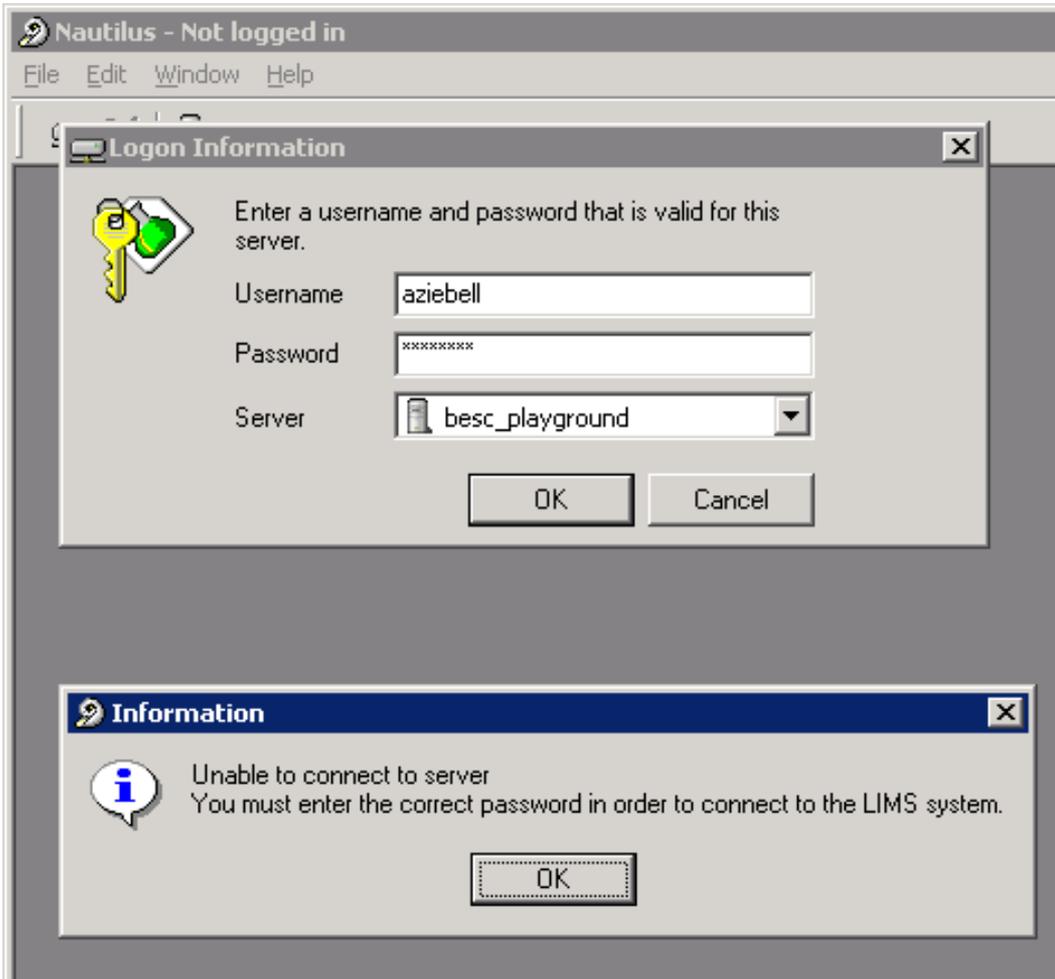

In this example, I entered the following into setup which are not legitimate:

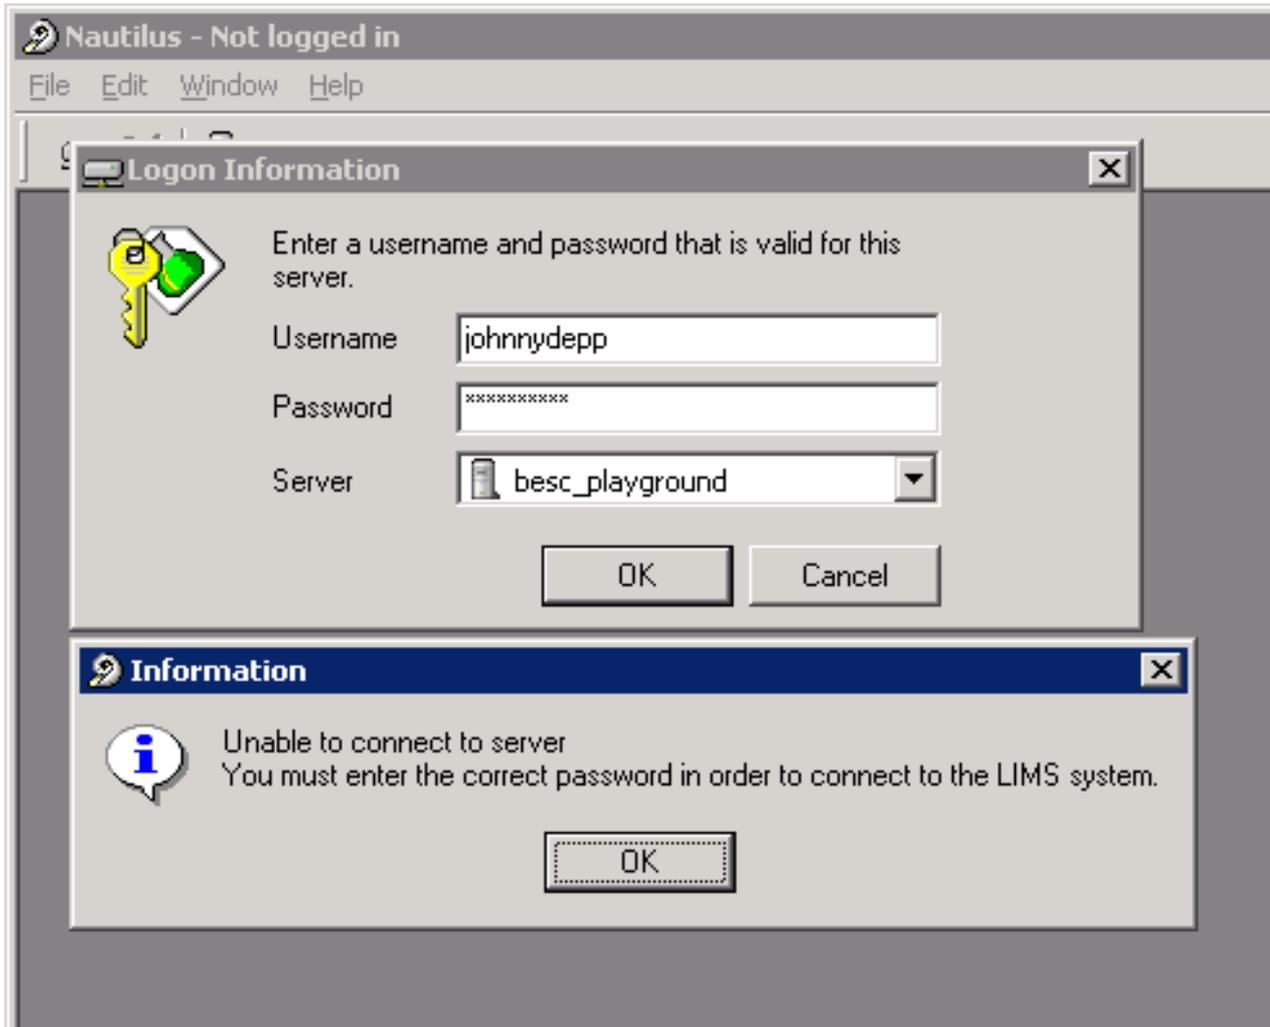

Server	july
Type	O10 Oracle 10g
Information	

# Incorrect password

Incorrect password error

# Invalid Operator

Captain Jack isn't an operator in the BESC LIMS, but the error still is incorrect password.
